

FACILITIES EQUIPMENT TECHNICIAN II

JOB DESCRIPTION

Classification Responsibilities: A Facilities Equipment Technician II is responsible for performing skilled work in one or more mechanical equipment trade areas such as: heating, ventilation, air conditioning/refrigeration (HVAC/R); electrical; plumbing; evaporative coolers; and other mechanical equipment in City buildings. Employees perform a wide variety of skilled tasks in installing, maintaining, and repairing HVAC/R, plumbing, and mechanical equipment; and electrical systems, equipment, and fixtures. In addition, this classification is responsible for independently planning and completing large maintenance projects which includes developing a scope of work, obtaining proposals, securing funding, awarding the project, following through to a successful completion, and documenting. This position may also act as a lead worker for Facilities Equipment Technician I or Trades Workers on various projects. Work assignments are varied and may be received verbally or in writing. This class performs other related duties as required.

Distinguishing Features: A Facilities Equipment Technician II is distinguished from a Facilities Equipment Technician I by the ability to independently plan, manage, and complete larger and more complex building maintenance projects. Additionally, the Facilities Equipment Technician II is expected to demonstrate a greater specialized knowledge and work independently by prioritizing their time, utilizing problem solving methods, and demonstrating good judgment and a high degree of tact and diplomacy. An employee in this class may be assigned to Facilities Management (example: City Hall, Police Headquarters, and other City-owned properties), or Parks, Recreation and Community Facilities (PRCF) (example: Hohokam Stadium, Fitch Park Training Facility, etc.). Employees may progress to this class by noncompetitive promotion upon meeting the specific criteria-based promotion requirements of performance and certification. Responsibilities require the exercise of initiative and independent judgment in troubleshooting malfunctions and determining the proper method of repair. A Facilities Equipment Technician II is subject to stand-by duty and 24-hour call-out. Employees are required to use appropriate safety equipment and procedures in performing assignments. This class is FLSA nonexempt.

QUALIFICATIONS

Employee Values: All employees of the City of Mesa are expected to uphold and exhibit the City's shared employee values of Knowledge, Respect, and Integrity.

Minimum Qualifications Required. Considerable (3 - 5 years) commercial journey-level experience in the trade related to the area of assignment (example: HVAC/R, electrical, plumbing, etc.). Successful completion of a four-year apprenticeship program in the trade related to the area of assignment (must provide written certification); OR state-issued journeyman card in the trade related to the area of assignment (must provide proof); OR provide documentation of ten years of journey-level work experience in the trade related to the area of assignment.

Special Requirements. Must possess a valid Class D Arizona Driver's License by hire or promotion date. Must possess an Environmental Protection Agency (EPA) refrigeration certification card (**by assignment**). Due to the required access to all City buildings for this position, an individual receiving a conditional offer of employment from the City of Mesa must pass a background investigation through

the City of Mesa Police Department, the Arizona Department of Public Safety, and Federal Bureau of Investigation prior to commencing employment with the City of Mesa to allow escorted access to police facilities (*Facilities Management assignment*).

Substance Abuse Testing. Due to the safety and/or security sensitive nature of this classification, individuals shall be subject to pre-employment or pre-placement alcohol, drug and/or controlled substance testing as outlined in City policy and procedures (*by assignment*).

Preferred/Desirable Qualifications. Considerable experience with Computer Managed Maintenance System (CMMS) software and energy management systems.

ESSENTIAL FUNCTIONS

Communication: Communicates with other City employees, vendors, management, and contractors in order to determine nature of problem and best method of repair. Records inspections and all service performed on a daily log.

Manual/Physical: Installs, maintains, and repairs all mechanical equipment (example: chillers, air handlers, pumps, evaporative coolers and cooling towers, lavatory equipment and fixtures, drinking fountains, and ice machines). Maintains electrical equipment up to and including 480 volt 3-phase. Maintains kitchen equipment such as refrigerators, ovens, steamers, coffee urns, meat slicers, mixers, and dishwashers. Maintains pools, fountains, pumps, etc. Troubleshoots small and heavy-duty electrical equipment. Replaces light bulbs, fluorescent lights, ballasts, receptacles, switches, circuit breakers, and fuses. Maintains proper levels of water, oil, and refrigerants in the system as specified by operating and maintenance guides. Inspects equipment and corrects leaks and faulty functioning on components such as: thermostats, generators, fans, valves, recorders, bearings, solenoids, etc. Lubricates various parts of machinery and equipment as required. Performs preventive maintenance on, and repairs, equipment and component parts. Resets thermostats and zone controls. Tests water to determine chemical concentrations and prevent scale and corrosion buildup. Repairs and services plumbing fixtures such as those used in lavatories (commodes and sinks), hot water heaters, natural gas heaters and boilers, drinking fountain valves, piping, drains, and sewers. Operates a forklift, pickup truck, and bucket truck requiring a standard Class D Arizona Driver's License to move equipment, pick up parts, and work on a marquee. Meets scheduling and attendance requirements.

Mental: Prioritizes own work such as scheduling needed maintenance. Coordinates work activities such as setting up crews and determining area availability. Understands blueprints, schematic drawings, and layouts to troubleshoot building problems. Estimates labor and material costs from work orders involving major downtime of equipment.

Electrical Assignment

Manual/Physical: Inspects objects and data to determine compliance with operating or safety standards. Distinguishes colors to work with color-coded electrical wires. Sets up and reads test equipment such as voltmeters, ammeters, and infrared heat detectors. Measures distances using a tape measure and calibrated instruments. Operates a motor vehicle such as bucket trucks, trenchers, and service vans requiring a standard Class D Arizona Driver's License. Sets up and operates power-driven machinery such as generators, conduit benders, rotary hammers, pipe benders, wire pullers, saws, etc.

Turns and pulls wire. Installs receptacles. Installs conduit in overhead spaces. Inserts circuit breakers and sets adjustable limits on equipment. Installs, replaces, or adjusts filters, light bulbs, etc. Works in small, cramped areas, at heights greater than ten feet, and in close proximity to high voltages. Climbs ladders or steps to reach objects. Walks over rough, uneven, or rocky surfaces. Moves debris, dirt, or other material. Moves objects weighing up to 50 pounds in order to perform work. Sets up or removes barricades and traffic cones when laying wire near traffic. Installs temporary power poles and light standards. Uses common hand tools such as a hammer and screwdriver. Enters data into a personal computer (PC). Cleans equipment using cleaning fluids and agents. Works with chemicals and paints using specialized and non-specialized protective equipment. Works in all weather conditions. Meets scheduling and attendance requirements.

HVAC/R Assignment

Manual/Physical: Repairs and performs preventive maintenance on heating and air conditioning equipment and component parts. Checks and cleans the City's hot water boilers for heating, gas furnaces, and electrical heating systems. Uses a welder and/or pipe bender. Uses common hand tools such as hammers, screwdrivers, saws, pipe wrenches, and pipe cutters. Operates up to a one-ton truck requiring a standard Class D Arizona Driver's License to drive to various job sites with appropriate tools, materials, and equipment in order to complete work assignments. Turns on gas, ignites pilots, and checks electric duct heating devices and calibration controls. Repairs, cleans, and treats water fountains, ice machines, evaporative coolers, and cooling towers. Tests water to determine chemical concentrations and prevent scale and corrosion buildup. Places equipment in operation, checking various gauges and instruments. Maintains proper levels of water, oil, and refrigerants in the system as specified by operation and maintenance guides. Inspects equipment and corrects leaks and faulty functioning on such components as thermostats, generators, fan valves, recorders, bearings, and solenoids, etc. Lubricates various parts of machinery and equipment. Works in small, cramped areas and at heights greater than ten feet. Detects natural gas leaks. Meets scheduling and attendance requirements.

HVAC/R, Electrical, Plumbing Assignment

Communication: Communicates with City employees, vendors, or others to explain the operation of facilities equipment and controls. Determines the nature of the problem, orders parts, takes corrective action, and follows-up on repairs. Produces written documents such as work orders or requests to maintain records of work activities, requisition materials, and coordinate activities with other departments and City personnel.

Mental: Comprehends and makes inferences from written material in order to troubleshoot, repair, and install equipment and systems. Reviews instruction sheets and specifications in order to make recommendations regarding replacement of units or systems and make changes to control methods. Conforms to EPA safety standards when dealing with refrigerants, oils, and other chemicals. Maintains preventive maintenance records and tracking of parts and equipment.

Plumbing Assignment

Manual/Physical: Repairs and services plumbing fixtures (example: commodes, sinks, and swimming pool dressing facilities) and other related items such as hot water heaters, natural gas heaters, boilers,

drinking fountains, valve piping, drains, and sewers. Services and repairs evaporative coolers, air compressors, and pneumatic tube systems. Operates up to a half-ton truck requiring a standard Class D Arizona Driver's License to drive to various job sites with appropriate tools, materials, and equipment in order to complete work assignments. Uses a welder, pipe threader, pipe bender, and metal bender to fabricate parts for repair. Uses common hand tools such as hammers, screwdrivers, saws, pipe wrenches, and pipe cutters. Inspects meters, gauges, etc., to determine compliance with operating or safety standards. Distinguishes colors to locate and repair color-coded pipe. Measures distances using a tape measure to fit pipe properly and install fixtures. Works with cleaning fluids using specialized protective equipment. Installs, replaces, or adjusts filters to provide an adequate flow to plumbing systems. Performs physical inventories. Moves dirt from one place to another using a shovel or other tool in locating plumbing problems. Moves water heaters and drinking fountains weighing up to 50 pounds for distances of 20 feet or less. Works in small, cramped areas and at heights greater than 10 feet. Detects natural gas leaks. Meets scheduling and attendance requirements.

Knowledge/Skills/Abilities:

Knowledge of:

the competitive bid process for projects;
the methods, practices, tools, and materials used in electrical, plumbing, HVAC/R, evaporative coolers, maintenance work, and energy management systems;
occupational hazards and necessary safety precautions applicable to work around high voltages, adverse climatic conditions, high pressure, and refrigerant systems, etc.;
welding/brazing techniques, as necessary;
provisions of the national and local construction codes as applied to installation, maintenance, and repair work; and
safe work practices and hazards specific to the trades.

Skill in:

the use and care of tools and equipment necessary to perform various mechanical repair tasks; and
reading and interpreting building schematics and blueprints.

Ability to:

work independently to plan, bid, and complete maintenance projects;
handle all physical requirements of the class;
work with, and occasionally supervise, other workers effectively; and
use arc and acetylene welding equipment, as needed.

HVAC/R, Electrical, Plumbing Assignment

Ability to:

retrieve, analyze, and enter data into a personal computer;
record inspections and all services performed on a daily log;
estimate labor and material costs from drawings and plans;

review and prioritize work requests to minimize time and materials used;
perform preventive maintenance inspections and repairs;
monitor contractors on engineering construction projects and report deficiencies;
perform needed emergency repairs on HVAC/R, electrical, and plumbing systems;
prepare hazardous waste materials for disposal/pick up; and
perform other work related to facilities maintenance functions.

The duties listed above are intended only as general illustrations of the various types of work that may be performed. Specific statements of duties not included do not exclude them from the position if the work is similar, related, or a logical assignment to the position. Job descriptions are subject to change by the City as the needs of the City and requirements of the job change.
