

Speed Hump Policy

Transportation Department

Transportation Advisory Board

March 20, 2018

Sabine Ellis, City Traffic Engineer

History of Current Speed Hump Policy

December 1997 – Policy formally adopted, typically only properties adjacent to the street included in survey and along cul-de-sacs or looping streets intersecting the subject street

January 2000 – Policy revised to expand survey area and include three properties **or** a minimum of 300 feet on side streets

July 2012 – Transportation Advisory Board (TAB) rejected to reduce the level of neighborhood support to something less than 70% and to only include properties adjacent to the street

January 2013 – Policy revised to remove the "**or**" clause to ensure consistent application: properties within a minimum of 300 feet on side streets to be included in survey

June 2016 – TAB rejected request to expand neighborhood survey area to include everyone who potentially drives the subject street

New Process

No Change

New/Modified

Process Mirrored

Speed Cushions

Step 1: Traffic calming request made

Step 2: Staff evaluation; Fire Department Approval

Step 3: Conduct Speed Study (speed & volume)

Step 4: Neighborhood Acceptance Survey (300')
If speed and volume criteria have been met
*At least **70% of affected owners** must approve*

Step 5: Neighborhood Denial Survey (600')
If 70% of affected owners approved
*Less than **70% of affected owners** are opposed*

Step 6: Public comment period

Step 7: Transportation Advisory Board (TAB) Approval

Installation
